# CATTLE BURNED

## Big Fire on Wenner Farm Destroys Large Barn and Much Valuable Property

A big fire on Middle Neck Road last Saturday morning, when a large barn and its contents on the farm occupied by Henry Wenner was burned to the ground, brought out the village fire department and attracted a crowd of people. Four horses, three cows, one calf, a lot of harness, potatoes, hay, straw and numerous other property were burned.

The alarm was sounded about 5 o'clock, at least an hour after the fire started. The fire had gained a good headway before the Flower Hill Hose Co., the nearest to the scene, arrived. A line of hose was run from the nearest hydrant but the distance was too far to be of much service, as it was Chief Snow's desire to save Mr. Wenner's dwelling and two other nearby buildings. Nassau and Protection Hose Companies arrived in time to attach some of their hose and the work of the firemen was very effective. It was utterly impossible to save the barn as the fire was entirely beyond control when the firemen arrived. Some one was very much at fault for not giving the alarm promptly.

Several of the firemen complained about the water pressure and claim that they had to reduce the nozzles from a two inch to three-eighths, but the fact is a leaky hose was responsible for the poor pressure. The hose was a mass of leaks from one end of it to the other.

It is said that Mr. Wenner was fully insured and his loss will not be as great as was at first supposed.
